+92 324 1272531 | hamzaadeel621@gmail.com | Karachi, Sindh, Pakistan | github.com/Hamza-Adeel | linkedin.com/in/hamza-adeel-h

PROFESSIONAL SUMMARY

Motivated Artificial Intelligence student pursuing a Bachelor's degree in AI (BSAI), with hands-on experience in Python development, Agentic AI, and full-stack web technologies. Skilled in building AI-powered applications using the OpenAI Agents SDK, FastAPI, and Next.js, with a strong foundation in data analysis, machine learning concepts, and workflow automation. Eager to contribute to real-world AI and machine learning projects in a collaborative, professional environment.

EDUCATION

Bachelor of Science – Artificial Intelligence (BSAI) | *Sindh Madressatul Islam University, Karachi*
2023 – Present

Intermediate: Pre-Engineering | *PECHS Education Foundation College, Karachi*
2021 – 2023

COURSES & TRAINING

Artificial Intelligence, Web 3.0 & Metaverse | *Governor's Sindh IT Initiative, Karachi* 2023 – Present

- Quarter 1 – TypeScript fundamentals and type-safe programming
- Quarter 2 – Next.js for full-stack, server-rendered web applications
- Quarter 3 – Agentic AI with OpenAI Agents SDK: multi-agent systems, tool calling
- Quarter 4 – Model Context Protocol (MCP)

TECHNICAL SKILLS

Python (Streamlit, NumPy, Pandas, Matplotlib, FastAPI), Next.js, TypeScript, JavaScript, HTML, CSS, Machine Learning, Agentic AI (OpenAI Agents SDK), Docker, Spec Driven Development.

PROJECTS

Physical AI & Humanoid Robotics Textbook

Technologies: Python, OpenAI Agents SDK, FastAPI, Docusaurus, Cohere Embeddings, Qdrant Cloud

- Built an AI-native learning platform covering Physical AI, ROS 2, NVIDIA Isaac Sim, and VLA systems.
- Developed a RAG-based chatbot using Cohere Embeddings, Qdrant Cloud, and OpenAI Agents SDK for context-aware responses.
- Built and deployed a FastAPI backend on Hugging Face Spaces using a Dockerfile.

Full-Stack AI-Powered Todo App

Technologies: Python, Next.js, TypeScript, Tailwind CSS, FastAPI, OpenAI Agents SDK, Neon Serverless PostgreSQL, Docker, Kubernetes (Minikube), Helm

- Developed a todo application supporting both AI-powered chat commands and manual task management.
- Implemented user authentication and task storage using Neon Serverless PostgreSQL.
- Built REST APIs and deployed the application locally with Docker, Minikube, and Helm.

Github URL: <https://github.com/Hamza-Adeel/ToDo-App-Kubernetes-Helm>

EXPERIENCE

Amazon FBA Virtual Assistant | MKEC Commerce – Remote (UAE)

Dec 2023 – Dec 2025

- Conducted systematic product research and keyword optimization using tools like Helium 10, applying data-driven analysis to improve store performance.
- Managed inventory data, performed market trend analysis, and generated actionable insights to support seller decision-making.
- Collaborated remotely with international sellers, demonstrating strong communication, task management, and cross-functional teamwork skills.
- Automated repetitive research tasks by developing structured workflows, improving team efficiency and data accuracy.
